

1

Authorize game site with Metamask and buy 100 Immoon tokens for 0.01 BNB

2

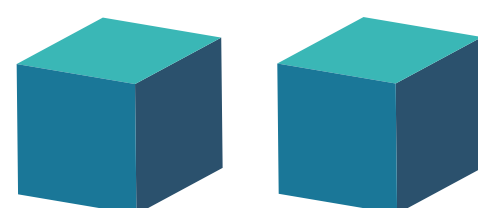

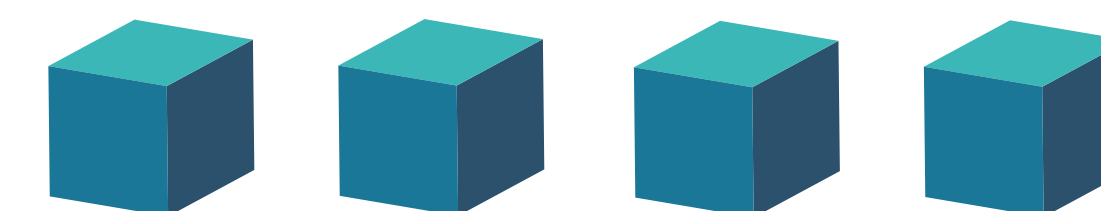

Go to your Lab and create genomes of your virus or antivirus creature

3

Join deathmatch against all enemies at the same time. Game time ticks each BSC blockchain block

4

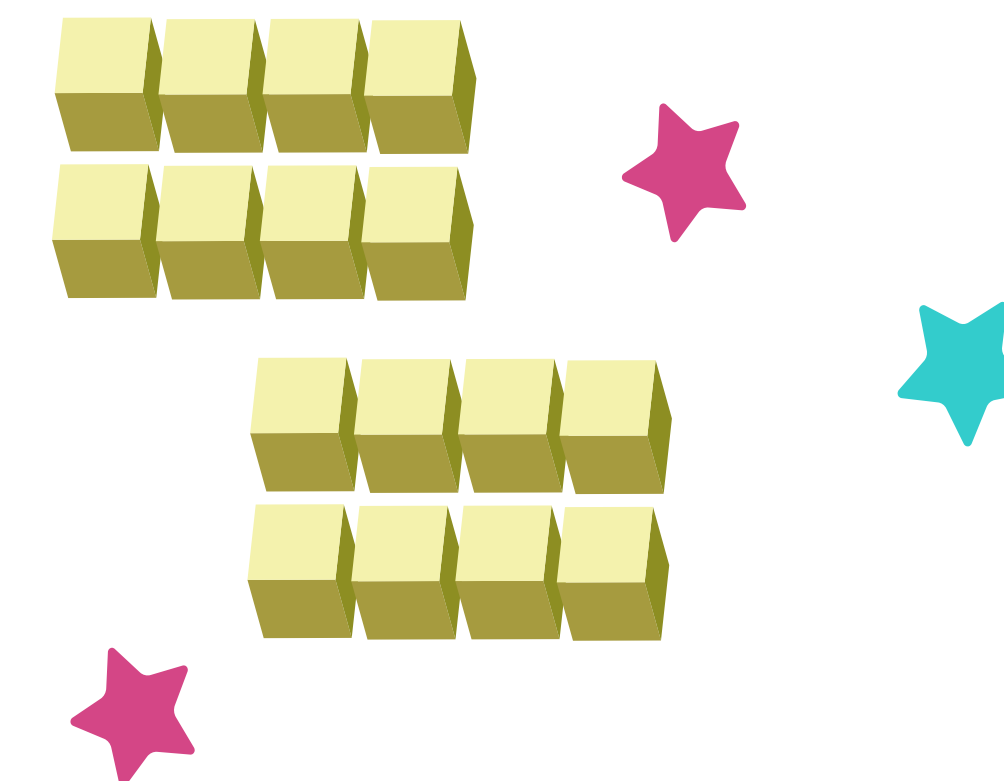

Random folding and unfolding of all game creatures will distribute Immoon tokens for the winners

5

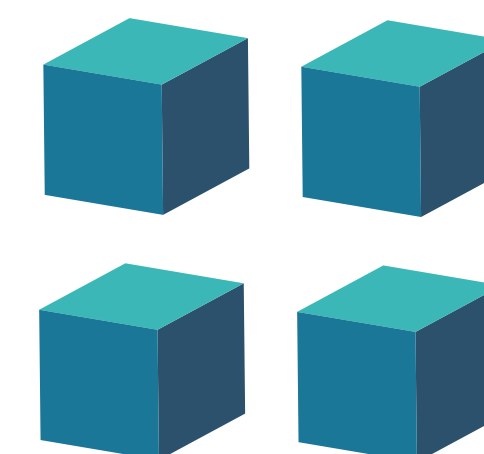

While game time ticks, magical processes inside all creature genomes can produce Spin-off VvV NFT tokens that reflect the re-combinations of their genomes

6

The Immoon tokens and VvV NFT tokens are magically distributed to the gamers. The next generation of the Spin-off VvV NFT tokens are started producing if current population of virus dies

7

Endless.
